

<b>UKHACC Manifesto</b>	<b>Labour</b>	<b>Conservative</b>	<b>Libdem</b>	<b>Green</b>	<b>Reform</b>	<b>SNP</b>	<b>Plaid Cymuru</b>
<b>End fossil fuel dependency</b>							
Just transition to clean energy	Y		Y	Y		Y	Y
End subsidies and new licenses	Y		Y	Y		Y	Y
Financial investment in clean energy	Y	Y	Y	Y		Y	
Reduce energy demand (insulation of homes/buildings/public transport)	Y	Y	Y	Y			Y
<b>Ensure a healthy environment</b>							
Affordable, environmentally-friendly housing for all	Y		Y	Y			Y
Improved, affordable public transport			Y	Y		Y	Y
Planning that makes walking and cycling easy and safe			Y	Y			Y
Access to green spaces for everybody within a 15-minute walk of their home				Y			
Protected waterways and improved access to safe blue space	Y		Y	Y			
<b>Transform the food system</b>							
A public awareness campaign promoting healthy diets				Y			
Support for farmers to transition	Y	Y	Y	Y			
Healthy food to be readily available and affordable			Y	Y			
<b>Meeting international climate commitments</b>							
The UK to meet existing financial commitments	Y	Y	Y	Y		Y	
Develop innovative ways to increase financial investments to support climate and ecological action through public/private sector partnerships	Y			Y			
<b>Transform health and care services</b>							
Significant investment in public health and integration with health and care services to benefit health, care, and the environment. Policies are needed to promote clean air, active travel, healthy diets, and easy access to green and blue spaces to prevent ill health and reduce pressures on health and care services			Y	Y			
Improved access and use of green space on the NHS estates							
Funding for green social prescribing			Y				
Funding of and appointment of staff throughout health and social care to lead on decarbonisation							
Capital investment to decarbonise health and social care buildings and estates							
Acceleration of the zero-emissions ambulance fleet from the current goal of 2036 to 2030							
Plans to dramatically reduce waste from care services, including avoiding single-use items wherever possible				Y			
Increased attention to adapting community health and care services to the effects of the climate and nature crisis							
Healthy largely plant-based foods for all patients and staff in care settings							
Annual audited public reporting of the carbon footprint of community health and care services							
Policies to drive the cultural and societal shift needed to secure a healthier, more sustainable way of life
